## FINANCE AND TRADE.

FINANCE.

OFFICE OF THE DAILY APPRAL, MEMPHIS, September 25, 1869. Our financial market was quiet to-day in all its aspects. Everything betokened calmness after the sterm and excitement of Friday, and the quietude was only disturbed by the narration of incidents that the total up to the ist of December, compared with last year, will afford the last of our receipts for the transpired on the previous day. The few lame ducks slightly wounded by transactions during the excitement were as mute as mice and had little information for the reporters. Only a few were slightly injured. The Gold market here was quiet and dealers refused to pay over 131c. Sales were in small, scattering sums, ranging between 130 and 131. The turmoll in the Gold market on Wall street and elsewhere, without los entirely subsided, as will be seen by our dispatches, and the panic has transferred itself to the stock board. In Exchange there was some demand

for commercial bills, which are taken at 14 discount. Selling rates are 14 preminm with indications of a rise to par next week, New Orleans Exchange is selling at 15 premium, and buying at 14 discount.

Several lots of City Bonds have changed hands during the last few days and have been transferred to the East. Prices are 44 to 46c.

A lot of Memphis and Charleston Rallroad Bonds were on the market and offered at 45c, without finding a purchaser. There was nothing doing in Scrips, and we give the following as the nominal

SPIRITS—Whisky scarce. Highwines in demand at \$1,20 to 1 25; Common Rectified to Proof 80; to \$1 26.

YINGAR—Cider \$8 to 10 per bid; Wine Sly to 15,825, showing a decrease of more than half; but to-day's arrivals have greatly reduced the difference, the receipts proper amounting to 4600 bales, against 1834 on the same day in last September, making the total since the last instant 14,000 bales, against 26,659. The resembert of the month last year were about 15,000 bales, and if during the consuing eight days we get two-thirds of that amount it will make a total for the month of about 27,000 bales, or 2000 more than was generally expected last week. While we are thus behind last year, the receipts at the other delivering ports exhibit a material increase. During last week, for example, they embraced 3462 bales at Mobile, against 383; 1199 in North example, they embraced 3462 bales at Mobile, against 122; and 1896 at Galveston, making a total of 20,110 against 3921. The copious receipts at the Atlantic ports are ascribed to favorable weather for picking, and should not be regarded as indicative of the crop in these tirbutary districts any more than our short receipts are of the crop in the missing west—Leave Hopefeld daily at 8:00 DRY GDC

ributary districts any more than our hort receipts are of the crop in the Mis-

ber, compared with last year, will afford no bad indications of our receipts for the year. It is anticipated that in the At-lantic States also the receipts will con-tinue liberal throughout October and No-vember, but from that time show a marked falling off. Material injury has been suf-fered in those States from rust and shed-ding, and the Charleston Courser says that the general opinion is that the crops or South Carolina and Georgia will be diinished by those causes from on er to one third. The papers at the North and elsewhere, without much reflection or investigation, have set down the in or investigation, have set down the in-coming crop at 3,000,000, and occasionally, a leading fournal to show its superior wisdom, estimates it at 3,250,000. This is so widely different from the prevailing views in our cotton circles, that it seems difficult to account for such extravagant ideas on any other supposition than that the object in promulgating them is to bear down prices. No doubt this purpose has to some extent been accomplished, and the rapid and heavy decline at New York may be to some extent attributed to such tactics; and although other causes have had a depressing influence every where, yet planters are often advised to

and some engagements made at the lat-ter. The supply of tonnage is limited, but arrivals are expected which will af-ford the necessary facilities to shippers of Western produce as well as of our leading
